User manual collaborate.green

Welcome to collaborate.green

We have made this user manual to provide you with information on how to use the online collaboration platform. It should cover the main topics to get you started!

However, this manual does not cover the entire spectrum of possibilities. For a complete overview, please see the official Confluence User guide (Confluence is the software on which collaborate.green is based).

In case you miss something, or have questions, please contact Doris Schyns.
